

Who Knows What Will Happen With Your Retirement Next Year

If the Economy is good,
legislators probably **WON'T**
go after your retirement.

But

If the Economy is bad,
legislators probably **WILL** go
after your retirement pension
to balance the state budget.

An example of what can affect you is what is happening in Seattle right now with Amazon and the proposed Head Tax. If Amazon leaves Seattle, they may leave Washington State and that is a direct effect on Washington State's economy.
